

C.NEST

Microbioreactor

CBSFL002

A robust, flexible & reliable system for everyday culturing

High-throughput cultivation that enables four independent incubators to run at a time

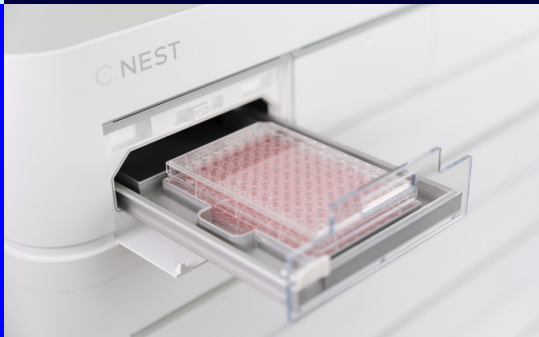

Precise control over environment and parameters all in a compact design

Outstanding flexibility in performing static, mixing and combined cultures in one system

Automation friendly to make integration with robotic arms possible

Upscalable design enables customization of capacity and throughput for personalized solutions

Intuitive interface and intelligent control designed for all levels of experience
